

Welcome

It's true in Texas. There is no difference between the care in a nursing facility and your home. You don't have to move away from your familiar surrounding. We can bring the medical care you need to your home. This is a better alternative - staying in your home while receiving health care assistance.

Fountain Home Health (F.H.H.) assists in acquiring the necessary supplies for diabetic care, ostomy care or wound care management and treatment. Our staff works closely with everyone concerned to ensure good patient and family education. Our registered nurses will supervise each case in order for us to provide the best health care services for our patients.

Home care is about choosing a personalized care for your loved one. You can be assured that your loved one receives one-to-one assistance and a helpful companion is with them at all times. It is always worth living when one is independent and is close to the people they love.

F.H.H. accepts referrals 24 hours a day, 7 days a week. Your loved one may be admitted to services within 24-48 hours after referral. To schedule an appointment, please give us a call at – (832) 275-8299 or you may come by our office to meet our health advisers.
